Portfolio: yuridelimadev.github.io

PROFESSIONAL SUMMARY

Computer Science undergraduate at UFPB with experience developing internal tools and automating workflows. Built Python and Streamlit applications to process documents and data, as well as JavaScript automation. Develops in Go and documented an asynchronous API architecture using FastAPI and message queues.

PROFESSIONAL EXPERIENCE

Vultus Cybersecurity Ecosystem

May 2025 to Aug 2025

Threat Intelligence Intern

- Collected and structured indicators and information from open sources, bulletins, and feeds for threat analysis.
- Organized evidence and findings into reports to support alert prioritization.

Alianca Motos

May 2024 to Apr 2025

IT, Automation, and Software Development Intern

- Developed Python and Streamlit applications to process PDFs and spreadsheets, reconcile records, and generate Excel reports.
- Built JavaScript and Chromium automation to collect catalog data and export it to Excel, replacing manual steps.

LIM | Interaction and Media Laboratory

Sep 2024 to Nov 2024

Associate Researcher, temporary and hybrid

- Contributed to software design and research projects alongside the internship at Alianca Motos.

IT4US Cyber Security

Aug 2023 to Dec 2023

Security Playbook Automation Intern

- Developed scripts and REST integrations to normalize events and connect steps in SOAR workflows.
- Documented playbooks, exception handling, and triage and response procedures.

TECHNICAL PROJECTS

AI as a Pool | Asynchronous architecture

- Contributed documentation and C4 diagrams for a design using FastAPI, Celery, RabbitMQ, Redis, PostgreSQL, and Docker Compose, covering queuing, retry, DLQ, and fallback. github.com/yurIdelLimaDev/-IA_como_Pool

DoBotShield | Go reverse proxy and WAF

- Developed a reverse proxy with HTTP and WebSocket inspection, IP/CIDR rules, rate limiting, structured logs, and automated CI checks. github.com/yurIdelLimaDev/DoBotShieldV2

EDUCATION

Federal University of Paraiba (UFPB)

2022 to Dec 2026 (expected)

Bachelor of Science in Computer Science

TECHNICAL SKILLS

Backend and automation: Python, Go, JavaScript, FastAPI, Streamlit, REST APIs, asynchronous processing, and data integration

Tools: Git/GitHub, Docker/Compose, GitHub Actions, CI/CD, and Linux

Data and messaging: SQL, PostgreSQL, Redis, and RabbitMQ

Languages: Native Portuguese | Fluent English | Fluent Spanish
